

## Cut and Fold Lines of Symmetry

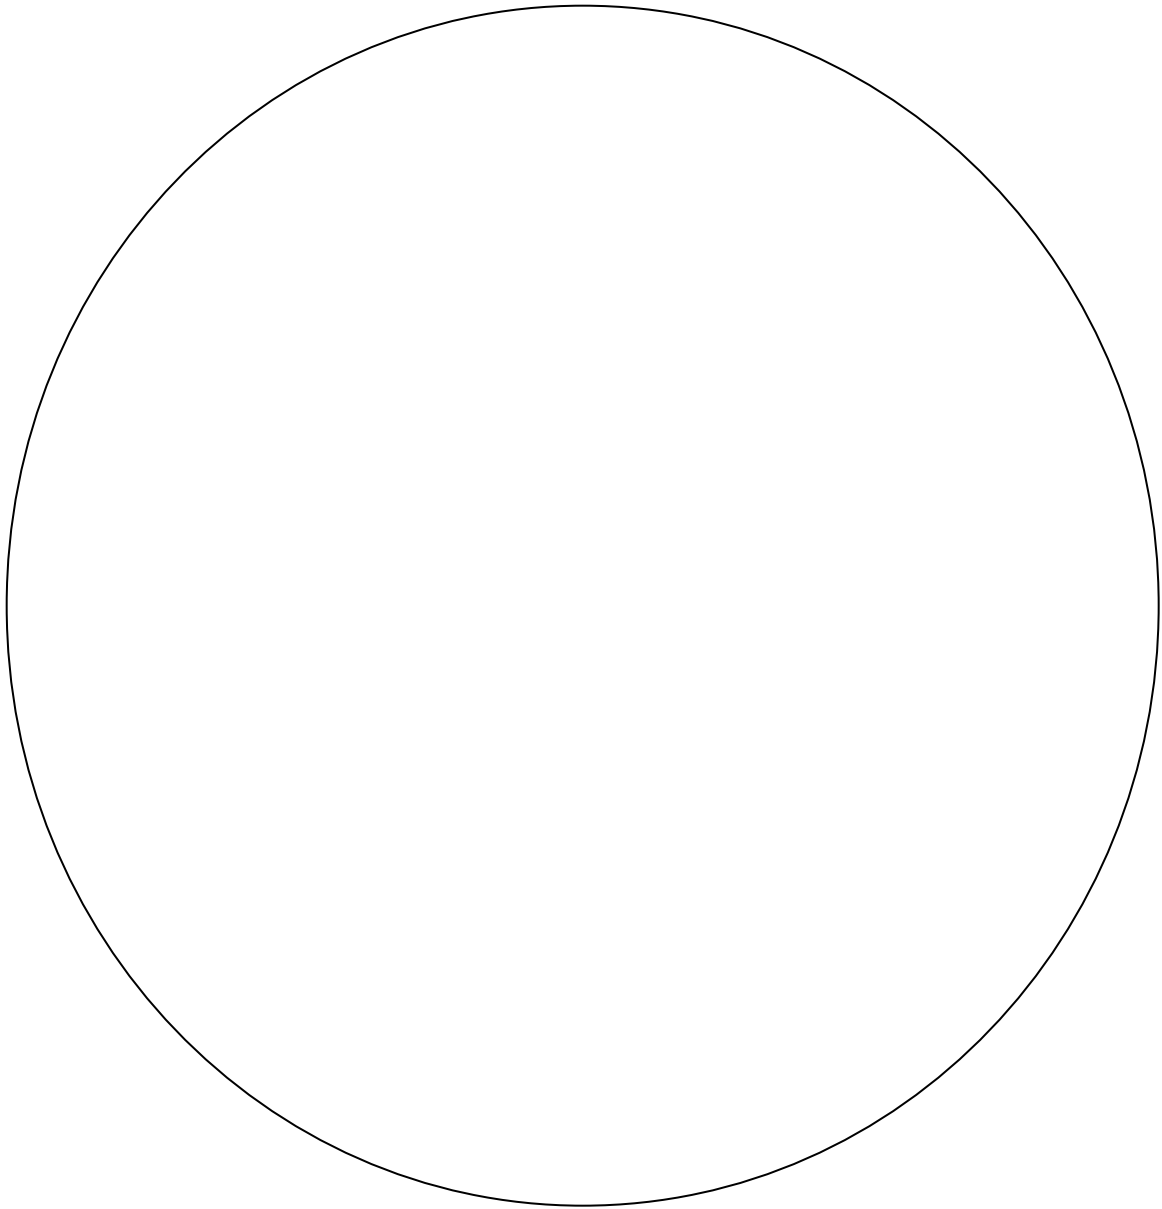

Cut out the square below. Fold on the lines of symmetry. A square has 4 lines of symmetry.

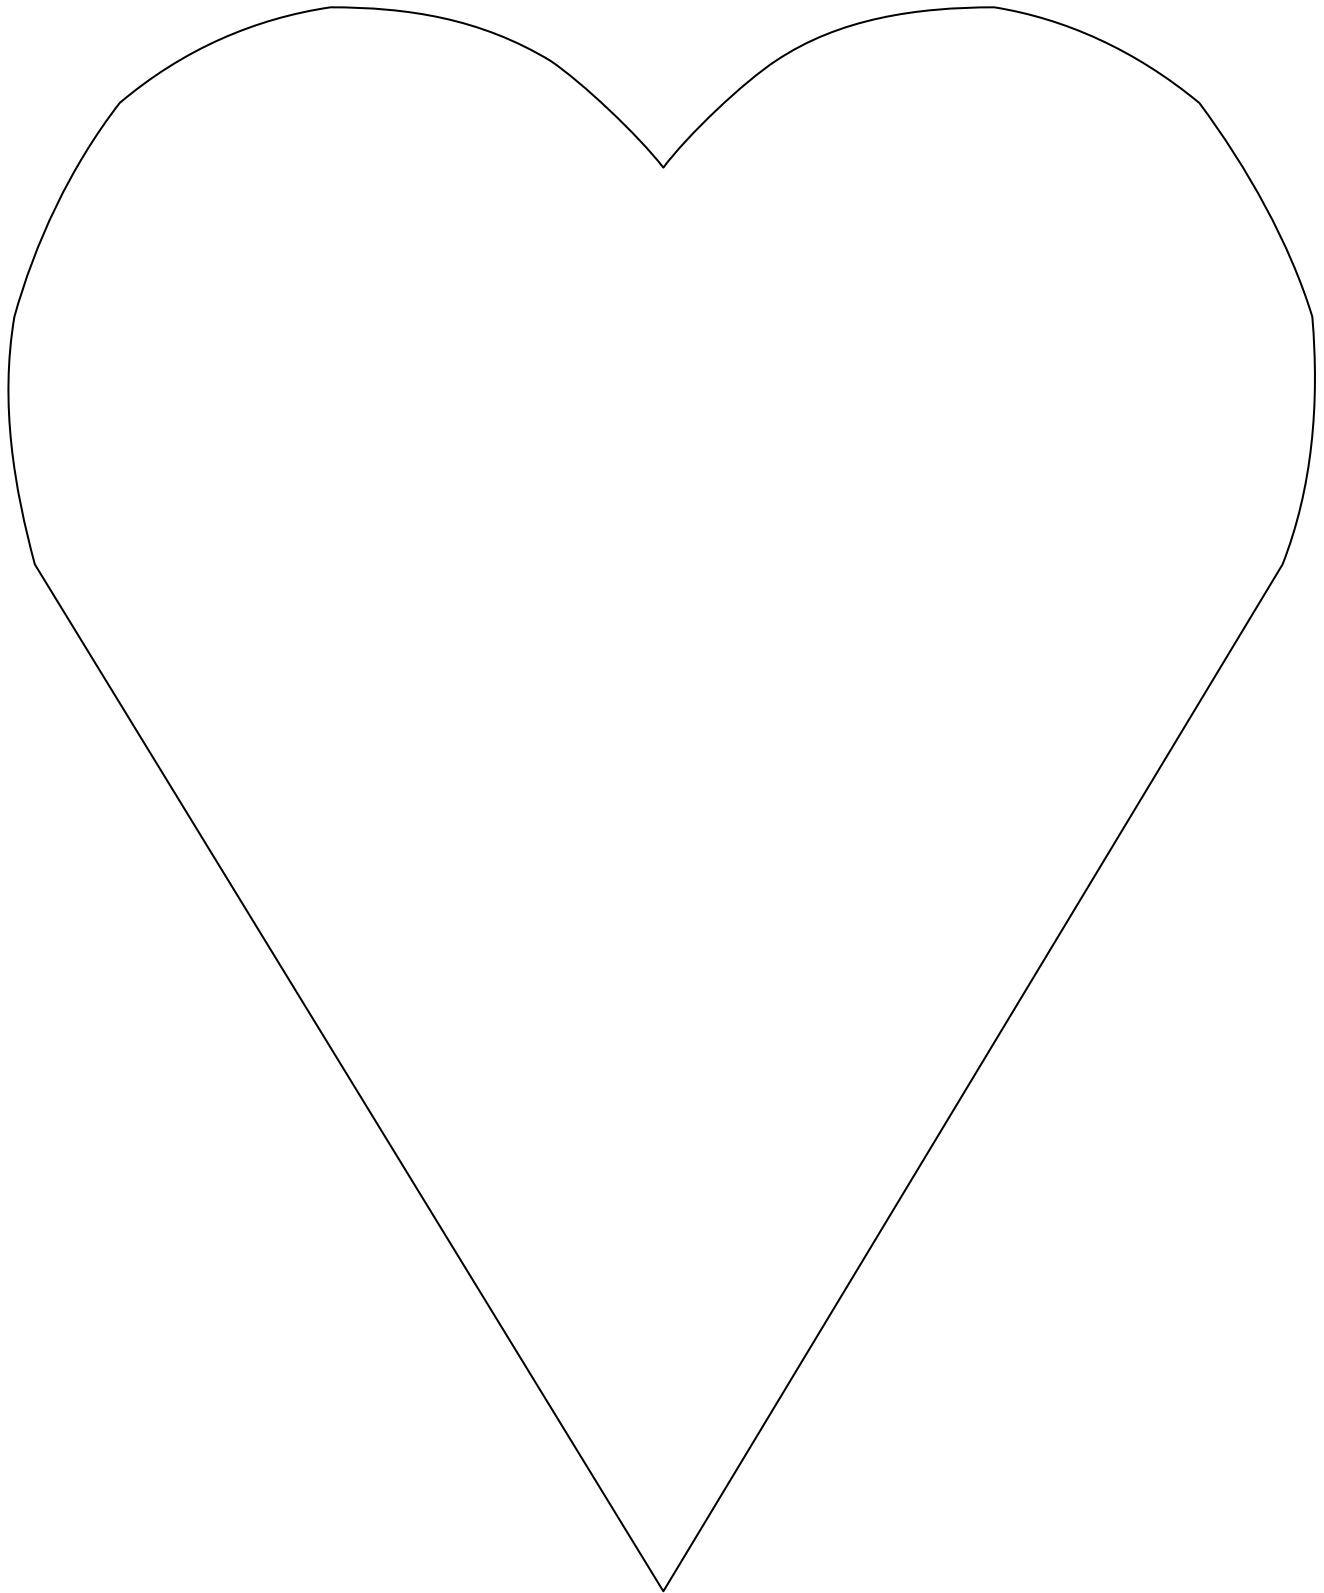

Cut out the rectangle below. Fold on the lines of symmetry. A rectangle has 2 lines of symmetry.

**Cut out the circle below. Fold on a line of symmetry. A circle has more lines of symmetry than you can count.**

Cut out the heart below. Fold on the lines of symmetry. A heart has 1 line of symmetry.

**Cut out the 5-pointed star below. Fold on the lines of symmetry. A star has 5 lines of symmetry. Can you find them all?**
